

Mini table light source ARC35 LED

LIGHT SOURCES > LIGHT SOURCES

Never change light bulb again. The mini table light source ARC35 LED delivers a high intensity white light using the latest LED technology which offers a lamp runtime of over 50.000 hours. These new lamps allow a precise control of illumination with an excellent color rendering to answer specific needs of rigid endoscopic inspections.

Its 12V power and compact format allow it to be used in a portable version (with battery pack) to use in outdoor inspections.
