604 000 212	Kit USB 2.0

Industrial monitor

17" & 19"

High resolution video monitor specially configured video inspection with endoscopes. It has LED technology.

This stands for durability with low operating costs. Numerous inputs allow you to connect various devices to these monitors. Besides two BNC slots, you also have a VGA and a HDMI slot available. Furthermore, you can feed in audio signals via PC Stereo or RCA (cinch) and make them audible via the integrated loud speakers. The maximum resolution is 1280 x 1024 with an aspect ratio of 4:3. A relatively strong luminosity of 300cd/sq m produces clear images even in a bright environment.
