

# Industrial endoscopes R-RZ

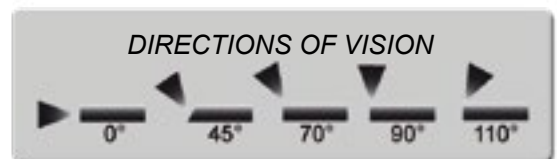

## Industrial endoscopes R-RZ

with or without zoom

Line of industrial endoscopes with diameters from 4 mm to 10 mm with large choice of working length, direction of visions and possibility of zoom 10x 20x.

All Rotascopes RZ are equipped with an ergonomical handle in anodized aluminium, have a rotative tube on 340°.

### MAIN ADVANTAGES

- ▶ Using the latest lens technology
- ▶ Very high resolution
- ▶ Large focus depth
- ▶ Excellent transmission
- ▶ Excellent recognisibility of details
- ▶ Extraordinary brightness
- ▶ Very high resolution both in the centre and the peripheral zone of the view field
- ▶ Makes the smallest fault visible
- ▶ Extremely wide range of uses for all types of applications

Great image quality for this line of endoscope due to the use of a special optical prism that generates great details of image. This technology brings a comfort of use and reduces fatigue of user during inspection.

This line can be equipped with an optical zoom 10x 20x. This allows a relative magnifying of up to 200x depending on object distance and field of endoscope.
